Valu-Rite® Report reflects its opinion as to the market value of the loss vehicle/asset based upon the information provided by client and/or insured and does not warrant the accuracy of such information as provided. This valuation and said process meets the *Uniform Standards of Professional Appraisal Practices (USPAP)*.

Our methodology to determine such market value incorporates the search and comparison to “like” vehicle/assets, for sale or having recently been sold, and/or dealer quotations, and/or previously valued vehicle/assets in the _____ database, in the market area. “Like” vehicle/assets are determined by a number of factors including but not limited to year, make, and model.

Adjustments (Price Factors) are made for variances between the Loss vehicle/asset and Comparable vehicle/assets, which may include but are not limited to Mileage/Hours, Equipment/Accessories, Model Year, Condition, Refurbishments, and Unique Customizations. These Price Factor adjustments are made on a line-by-line basis, calculated so that each vehicle is adjusted to a “standard/average” vehicle for comparison purposes. This includes mileage and all standard equipment.

If no information has been provided on certain price factors, _____ will use average/standard options. When model year variances are necessary, adjustments will be made at each non-standard option level and at the Model level for all standard options. Industry standards and resources are used for all valuations.
